

Olexii Pruzhanskyi

FRONTEND DEVELOPER

SUMMARY

Frontend Developer with a strong foundation in HTML, CSS, JavaScript, and modern web technologies. Experienced in creating responsive and adaptive web applications, with a focus on clean design and usability. Skilled in Git, REST APIs, and Vite, and actively expanding knowledge in React.js, TypeScript, and Node.js through the GoIT Full-Stack Developer program.

Demonstrated ability to work in both team-based and independent projects, contributing to the development of landing pages and interactive UI components. Strong analytical skills, problem-solving mindset, and adaptability.

PROJECT EXPERIENCE

Movie Search App, [Link](#) (HTML, CSS, JavaScript, React, REST API, Vite)

Built a responsive movie search application that allows users to find films by keyword using a public API. Integrated Axios for efficient API requests and React Router for seamless navigation between pages (e.g., movie details). Key features include real-time search, dynamic routing, and clean UI built with React.

Portfolio, [Link](#) (HTML, CSS, JavaScript, REST API, Vite)

Team project. Role: Team-lead & Developer.

Led a team of 9 developers, managed workflows, and was responsible for architecture and technical decisions.

WebStudio Landing, [Link](#) (HTML, CSS)

Pet-project. Responsive layout project with a more complex structure.

Watchcharm, [Link](#) (HTML, CSS)

Landing with a responsive layout.

Team project. Role: Developer. Was responsible for Reviews section.

BOSE Project, [Link](#) (HTML, CSS)

Landing for music product presentation. Landing with responsive design that displays equally well on all devices.

EDUCATION

Kyiv National Economics University
